

ASTRA 11.0

OFFICIAL PROTOCOL // 2026

EVENT GUIDELINES
& REGULATIONS ●

Turn the idea into a working prototype. Mandatory operational rules.

TEAM: 2-3 MEMBERS

DELIVERABLE: FULL PROTOTYPE

PITCH: STRICT 5 MIN

VENUE: ASTRA 11.0 @ SJ CET

01 // DOMAIN & TOPIC SELECTION

DOMAIN SCOPE

- **Kickoff Reveal:** The predefined technology domains will be revealed only at the beginning of the event.
- **Domain Selection:** Each team must select exactly one domain at kickoff.
- **Problem Statement:** Teams must formulate their own original problem statement within the selected domain.
- **In-Event Scope:** The problem statement must be defined and developed during the event.
- **Iterative Refinement:** Teams may refine their problem statement as they develop their prototype.

02 // PROTOTYPE REQUIREMENTS

DELIVERABLE

- **Functional Prototype:** Every team must produce a fully functional, testable prototype.
- **Core Relationship:** The prototype must demonstrate: Problem → Solution → Working Implementation.
- **No Static Mocks:** A concept, mockup, wireframe, or presentation-only solution is not a prototype.
- **Demo Readiness:** The prototype must be operational and demonstrable within the 5-minute window.

03 // RULES & CODE INTEGRITY

INTEGRITY

- **In-Event Build:** All core development work must be completed during the event.
- **Zero Pre-Built Code:** Pre-built projects, repositories, or core code prepared beforehand are strictly prohibited.
- **Allowed Foundations:** General-purpose templates, libraries, frameworks, and dev tools are permitted.
- **AI Code Policy:** AI-assisted tools and AI-generated code are allowed.
- **Code Mastery:** Teams must thoroughly understand and defend every line of their implementation.
- **APIs & Datasets:** Public APIs and datasets are allowed, provided licensing terms are respected.

04 // FAIRNESS & ETHICS

ZERO TOLERANCE

- **Independent Work:** Teams must build their solutions completely independently.
- **No Code Sharing:** Sharing code, files, or substantial implementation help between teams is prohibited.
- **Integrity Violations:** Plagiarism, impersonation, or unfair external assistance results in disqualification.
- **Verification Rights:** Organizers reserve full rights to inspect Git commit logs and project source code.
- **Final Authority:** Judges' evaluations, score decisions, and rankings are final and binding.

CRITICAL
ENFORCEMENT
PROTOCOL

Any unauthorized pre-built repositories, cross-team code sharing, or external tampering will result in instant disqualification without right of appeal. The technical committee will conduct automated diff audits on commit histories, repository signatures, and project dependencies throughout the event.

LAPTOPS & DEV READY

DEDICATED MENTORS

GIT AUDIT ACTIVE

PREDEFINED TECHNOLOGY DOMAINS

15 PROBLEM DOMAINS

Choose one domain at kickoff and formulate an original, high-impact problem statement.

01	AI Agents & Autonomous Systems	09	Media, Content & Digital Trust
02	Smart Cities & Urban Technology	10	Sustainability & Resource Management
03	Healthcare & Wellbeing Technology	11	Student Productivity & Campus Technology
04	Robotics, IoT & Intelligent Devices	12	Accessibility & Inclusive Technology
05	Disaster Management & Emergency Tech	13	Information Management
06	AI-Powered Applications	14	Creative Technology & Multimedia
07	Cybersecurity & Digital Safety	15	Data & Decision Intelligence
08	Education & Learning Technology	DOMAIN SCOPE & SELECTION NOTICE Select only from the given 15 domains. Exactly one per team.	

ENGINEERING DIRECTIVE: PROBLEM → SOLUTION → WORKING PROTOTYPE

Teams are not limited to generic templates. Formulate an original, practical problem statement within your selected domain. Your final deliverable must not be slides, wireframes, or static mockups; it must be an operational, testable software/hardware prototype presented to judges within the strict 5-minute window.

OWN SYSTEMS READY BEFOREHAND

IN-EVENT CORE DEVELOPMENT ONLY

AI TOOLS & PUBLIC APIS PERMITTED

GOT A PROBLEM WORTH SOLVING?

BUILD. TEST. PROTOTYPE.

Turn the idea into a working prototype. Real Ideas // Real Impact.

16K PRIZE POOL

TOTAL CASH AWARDS

17 SEPTEMBER 2026

SPRINT DATE

REGISTRATION: ₹300 / TEAM

2-3 MEMBERS

VENUE PROTOCOL: High-speed campus network, multi-plug hardware power outlets, and continuous technical mentor support.

STUDENT COORDINATORS:

MELWIN SANTHOSH: 6235764096

JUEL JOPHY: 9605573676

ORGANIZING DEPARTMENT & INSTITUTION:

DEPARTMENT OF COMPUTER APPLICATIONS

St. Joseph's College of Engineering & Technology, Palai
