

EVENT GUIDELINES & REGULATIONS

[OFFICIAL PARTICIPANT PROTOCOL]

Turn the idea into a working prototype. Mandatory operational rules from kickoff to demo.

[TEAM: 2-3 PARTICIPANTS]

[DELIVERABLE: WORKING PROTOTYPE]

[PRESENTATION: 5-MIN PITCH]

[VENUE: ASTRA @ SJCEET]

1. DOMAIN & TOPIC SELECTION

[DOMAIN SCOPE]

- **Kickoff Reveal:** The 15 predefined technology domains will be revealed only at kickoff.
- **Domain Selection:** Each team must select exactly one domain at kickoff. Open choosing outside these 15 domains is strictly barred.
- **Problem Statement:** Formulate an original, practical problem statement within selected domain.
- **In-Event Scope:** The problem statement must be defined and engineered during the sprint.
- **Iterative Refinement:** Teams may refine their problem statement as development evolves.

2. PROTOTYPE REQUIREMENTS

[DELIVERABLE]

- **Functional Prototype:** Every team must produce a fully operational, testable prototype.
- **Core Relationship:** Must demonstrate: Problem -> Solution -> Working Implementation.
- **No Static Mocks:** A concept, mockup, wireframe, or slides-only solution is not a prototype.
- **Demo Readiness:** The prototype must run live and be demonstrable in the 5-minute window.

3. DEVELOPMENT RULES

[CODE INTEGRITY]

- **In-Event Build:** All core development work must be completed during the event.
- **Zero Pre-Built Code:** Pre-built repositories or code prepared beforehand are strictly barred.
- **Allowed Foundations:** General-purpose boilerplates, libraries, and frameworks are permitted.
- **AI Code Policy:** AI-assisted tools and AI-generated code are fully allowed.
- **Code Mastery:** Teams must thoroughly understand and defend every line of implementation.
- **APIs & Datasets:** Public APIs and datasets are allowed, provided licensing is respected.

4. PRESENTATION & PITCH

[5-MIN PITCH]

- **Allotted Window:** Each team receives strictly 5 minutes for presentation and prototype demo.
- **Judging Panel:** Teams must present their live working prototype to the evaluation jury.
- **Evaluation Impact:** Exceeding the time limit or failing to present will directly penalize scores.

> PITCH BREAKDOWN (STRICT 5-MIN WINDOW)

- [01] 2 MIN: Problem context, user relevance & technical stack
- [02] 3 MIN: Live working prototype demonstration & jury Q&A

5. FAIRNESS, ETHICS & CODE OF CONDUCT

[ZERO TOLERANCE]

- **Independent Work:** Teams must build their solutions completely independently.
- **No Code Sharing:** Sharing code, files, or substantial implementation help is prohibited.
- **Integrity Violations:** Plagiarism, impersonation, or unfair assistance results in disqualification.
- **Verification Rights:** Organizers reserve full rights to inspect Git commit logs and project code.
- **Final Authority:** Judges' evaluations, score decisions, and rankings are final and binding.

> ZERO TOLERANCE ENFORCEMENT

Any unauthorized pre-built repositories, cross-team code sharing, or external tampering will result in instant disqualification without right of appeal. The technical committee will conduct automated diff audits on commit histories and project dependencies throughout the event.

BUILD-A-BOT @ ASTRA 11.0 // ORIGINALITY • ENGINEERING • EXECUTION

Build-a-Bot celebrates authentic hands-on engineering and practical problem-solving. Real Ideas // Real Impact.

✓ Laptops & Dev Tools Ready

✓ Dedicated Mentor Desks

✓ Git Commit Audit Active

STUDENT COORDINATORS: MELWIN SANTHOSH: 6235764096 // JUEL JOPHY: 9605573676

DEPARTMENT OF COMPUTER APPLICATIONS // ST. JOSEPH'S COLLEGE OF ENGG & TECH, PALAI

[REAL IDEAS // REAL IMPACT]

PREDEFINED TECHNOLOGY DOMAINS

[15 PREDEFINED DOMAINS ONLY]

Select exactly one domain at kickoff. Formulate an original, practical problem statement.

01

AI AGENTS & AUTONOMOUS SYSTEMS

09

MEDIA, CONTENT & DIGITAL TRUST

02

SMART CITIES & URBAN TECHNOLOGY

10

SUSTAINABILITY & RESOURCE MANAGEMENT

03

HEALTHCARE & WELLBEING TECHNOLOGY

11

STUDENT PRODUCTIVITY & CAMPUS TECHNOLOGY

04

ROBOTICS, IOT & INTELLIGENT DEVICES

12

ACCESSIBILITY & INCLUSIVE TECHNOLOGY

05

DISASTER MANAGEMENT & EMERGENCY TECHNOLOGY

13

INFORMATION MANAGEMENT

06

AI-POWERED APPLICATIONS

14

CREATIVE TECHNOLOGY & MULTIMEDIA

07

CYBERSECURITY & DIGITAL SAFETY

15

DATA & DECISION INTELLIGENCE

08

EDUCATION & LEARNING TECHNOLOGY

! NO OPEN TOPICS ALLOWED

MUST PICK FROM 01-15 ONLY. OUTSIDE TOPICS DISQUALIFIED.

! MANDATORY DIRECTIVE // STRICT PREDEFINED DOMAINS ONLY

[OPEN CHOOSING STRICTLY BARRED]

[1] EXCLUSIVE DOMAIN SELECTION: Every team MUST select their problem statement exclusively from one of the 15 Predefined Technology Domains listed above. Teams will officially log their single chosen domain at kickoff.

[2] OPEN TOPICS STRICTLY PROHIBITED: Open choosing or building solutions outside these 15 domains is NOT ALLOWED. Any project submitted outside these domains will face IMMEDIATE DISQUALIFICATION and will NOT be evaluated.

[3] PROTOTYPE MANDATE: Formulate an original, practical problem statement within your domain. Final deliverable must be an operational, testable software/hardware prototype presented in 5 minutes (no static mockups).

✓ Must Select from Domains 01-15

✓ In-Event Core Dev Only

✓ AI Tools & Public APIs Permitted

> GOT A PROBLEM WORTH SOLVING?

BUILD. TEST. PROTOTYPE.

Turn the idea into a working prototype. Real Ideas // Real Impact.
